

Sainsbury Wellcome Centre

# Job Description

## Senior Research Software Engineer

**Department:** Sainsbury Wellcome Centre

**Grade:** 8

**Salary:** £54,931 - £62,903 inclusive of London Allowance

**Hours:** 36.5

**Reports to:** Head Research Engineer – Dr Adam Tyson

**Available until:** Initially funded until September 2028 with the possibility of extension subject to grant funding.

---

### Context

The [Sainsbury Wellcome Centre](#) (SWC) brings together world-leading scientists to investigate how brain circuits process information to generate perception, form memories and guide behaviour. Developed through the vision and partnership of the Gatsby Charitable Foundation and Wellcome, and with substantial investment from these partners, the mission of the SWC is to generate experimentally testable theories of brain function. The Centre comprises 13 highly interdisciplinary experimental research groups accommodated in a new, purpose-designed building, offering an outstanding and unparalleled research environment.

SWC scientists use a broad spectrum of the latest advances in molecular and cellular biology, imaging, electrophysiology and behavioural techniques and enjoy state-of-the-art research laboratories, cutting-edge scientific equipment, technologically advanced prototyping and fabrication laboratories and custom in-house high-performance computing facilities.

The SWC is pioneering open-source approaches (such as [Aeon](#)) to study behaviour and brain function over long time scales (days to weeks).

Processing and analysing this data represents a considerable challenge due to the scale and the complexity of such long-term recordings (e.g. drift of electrophysiological recordings).

We are inviting applications for a research software engineer to be based in the [Neuroinformatics Unit](#), working with the laboratories of [Tom Mrsic-Flogel](#), [Tiago Branco](#) and [Tim Behrens](#).

---

### Main purpose of the job

The Senior Research Software Engineer will help build robust tools to process extracellular electrophysiology and video data. The aim is to simplify and accelerate data analysis, increase reproducibility, and facilitate novel experiments to understand the brain.

You will be responsible for developing, optimising, and using efficient tools to process and visualise large volumes of extracellular electrophysiological data (such as from Neuropixels probes) and behavioural data (such as from video recordings). This will include contributing to open-source packages such as "SpikeInterface" and "Movement" and implementing them within SWC pipelines (e.g. using DataJoint).

A key part of the role will be to efficiently process large-scale data recorded by researchers at SWC (e.g. from Aeon) and ensuring that data is processed accurately and efficiently.

Throughout the work you will also have opportunities to become involved in the research programmes at SWC assisting with and contributing to ongoing research projects.

A budget will be provided for travel and training relevant to the post and the post-holder's career aspirations.

---

## Duties and responsibilities

### Research (20%)

- Implement, develop and optimise algorithms for data processing.

### Software design and implementation (30%)

- Work as part of a collaborative development team to design new software architecture.
- Develop software according to agreed specifications, including writing tests and high-quality documentation.
- Maintain new and existing software, fixing bugs and improving performance.
- Contribute to other related open-source projects.
- Keep up to date with developments in relevant methods, tools and frameworks by the neuroscientific and open-source software communities.

### Data processing (20%)

- Ensure data analysis pipelines are operational
- Process experimental data, ensuring accuracy and robustness of the pipelines

### Training, support and dissemination (10%)

- Assist experimental collaborators applying software tools to their data.
- Respond to issues raised on GitHub repositories
- Support users of software by answering questions on relevant community forums

- Produce high quality training materials (e.g. tutorials) for potential users of the software.
- Design and deliver training courses (in person or online) for potential users of the software.

### Communication/Teamwork (15%)

- Communicate with users, and potential users of software tools to establish current and future needs.
- Identify potential new collaborations that could benefit from software tools.
- Participate in one to one and group meetings, hackathons and group and institute events.

### Other (5%)

- Update skills and education as required by attending and participating in continuing professional development education programmes.
- Attend research seminars pertinent to the post as designated by the Head Research Engineer and SWC faculty.

### General

- Actively follow and promote all UCL policies including those on Equality, Diversity and Inclusion.
- Maintain an awareness and observation of Fire and Health & Safety Regulations.
- There may, on occasion, be a requirement to work extended hours.
- Follow and actively promote the [UCL Ways of Working](#).
- This job description may be reviewed and be subject to amendment in consultation with the post holder.
- All staff are expected to act professionally, co-operatively and flexibly in line with the post.
- UCL's Sustainability policies and objectives, attend management meetings and undertake such training and development as may be required for the post

# Person Specification

Applicants should copy and paste the following essential criteria (which are assessed on the application form) into the “Statement in support of your application” and describe underneath each criterion how they meet it, giving examples.

Essential Criteria	Assessment method  (Application/ Interview)
<b>Qualifications, experience and knowledge</b>	
Undergraduate degree in neuroscience, computer science, physics, mathematics, biology or a related field.	A
Substantial experience developing software for data acquisition, analysis or visualisation (evidenced by successful project completion).	A/I
Substantial experience and knowledge of software development best practice including testing, documentation and version control.	A/I
Significant experience in Python and, ideally, at least one other programming language used in research (e.g. Julia, C++, MATLAB, R, Java)	A/I
Significant experience working with timeseries or video data.	A/I
Experience ensuring the quality and robustness of data processing pipelines.	A/I
<b>Skills and abilities</b>	
A commitment to developing robust, maintainable, documented software in an academic environment.	A/I
Ability to proactively identify areas for improvement and initiate new projects.	A/I
Ability to rapidly acquire a working knowledge of new programming languages, frameworks and libraries.	A/I
Ability to work with a team of scientists and research engineers to achieve defined outcomes.	A/I
Strong written and oral communication skills, with the ability to present complex information clearly and effectively.	A/I
Proven ability to manage multiple concurrent tasks and activities, working to deadlines and prioritising as appropriate.	A/I
Works ethically, legally and with integrity.	A/I

An understanding and appreciation of the mission and research environment of the SWC, and a commitment to the establishment of the SWC as a world-leading research centre.	A/I
Commitment to and knowledge of advancing equality, diversity and inclusion.	A/I
<b>UCL Ways of Working</b>	
<i>Personal Excellence</i> : Delivering on tasks and commitments to people.	A
<i>Working Together</i> : Sharing relevant knowledge and experience	A
<i>Achieving our Mission</i> : Making sense of complex issues even when information is incomplete.	A
<b>Desirable Criteria (to be scored if there is a tie break for shortlisting)</b>	
Postgraduate degree in neuroscience, computational biology, physics, computer science, machine learning or a related field.	A
Familiarity with extracellular electrophysiology and existing open-source analysis tools (e.g. SpikeInterface, Kilosort, Phy).	A
Experience working with video behavioural data and existing open-source analysis tools (e.g. DeepLabCut, SLEAP).	A
Experience working with databases and building data pipelines (e.g. with DataJoint).	A

# Apply

To apply for this position, please visit:  
[www.ucl.ac.uk/work-at-ucl/search-ucl-jobs](http://www.ucl.ac.uk/work-at-ucl/search-ucl-jobs) and search for vacancy reference:

Please complete the online application form and use the supporting statement section to outline your interest in joining SWC and how you meet the essential and desirable criteria for the role.

If you have any queries regarding the application process, please email:  
[swc.hr@ucl.ac.uk](mailto:swc.hr@ucl.ac.uk)

For informal enquiries about the role, please contact Head Research Engineer, Adam Tyson:  
[adam.tyson@ucl.ac.uk](mailto:adam.tyson@ucl.ac.uk)

All candidates will be notified of the outcome of their application.

## Annual Leave

Annual leave is 27 working days for a full-time member of staff + 6 UCL closure days in addition to 8 Bank Holidays.

## Hours of Work

UCL's full time working week is 36.5 hours per week. This role is eligible for hybrid working with a minimum of 40% of time on site.

SWC is willing to consider flexible-working arrangements, subject to discussion and agreement with your line manager.

Pre-agreed overtime will be offered as equivalent time off in lieu.

## Probation

Appointments are subject a 9-month probationary period.

## Pension

Post-holders will be eligible to join the Universities Superannuation Scheme (USS), subject to the Scheme's rules and eligibility conditions.

## Other Benefits

UCL is a dynamic, global university based in one of the most exciting capital cities in the world, offering competitive terms, conditions and [benefits](#) to its staff.

In addition to 41 days annual leave (inclusive of public holidays and closure days) and generous pension schemes, UCL provides a number of other [staff benefits](#). UCL benefits and policies apply equally, whatever the sexual orientation and/or gender identity of employees. Benefits and policies relating to employees' partners, includes both different sex and same sex partners.

As part of the UCL community you can access free lunch hour lectures, exhibitions, museums and collections.
