

Sainsbury Wellcome Centre

EMERGING NEUROSCIENTISTS SEMINAR SERIES

The Sainsbury Wellcome Centre for Neural Circuits and Behaviour (SWC) brings together world-leading scientists to investigate how brain circuits generate perception, form memories, and guide behaviour.

The postdocs of the SWC invite aspiring leaders in neuroscience to present their research to the SWC community in London as part of our Emerging Neuroscientists Seminar Series (ENSS).

We welcome applications from postdoctoral researchers around the world. Candidates should have a minimum of two years postdoctoral experience and should not have secured a faculty or group leader position at the time of application. Previous applicants who were not selected are welcome to apply.

Presentations will take place between Oct 2021 and Jan 2022. We are considering both in-person and virtual options depending on future COVID regulations. In-person travel and accommodation costs will be covered.
